

LANDESK® Data Analytics

2 Day Deep-Dive

MAKING THE MOST OF THE POWER AT YOUR COMMAND

I hear and I forget. I see and I remember. I do and I understand

COURSE OUTLINE

Ideal for up to eight students, this course is flexible¹ as needed. The agenda below gives an outline of content types. The majority of content involves hands-on exercises.

Day 1

- Aspects of Data Analytics (DA)
 - Solution Overview & Discussion
- Installing & Configuring DA
- LDMS Schema Extensions
- The role of Active and Scheduled Rules
- Understanding DA Rule Types Including Hands-On
 - Standardisation/Normalisation/Calculations etc.

Day 2

- Understanding DA Rule Types (continued)
 - Import/Export
 - CSV & Data Sources
- Software Licensing Rules
 - Software Recognition/Licensing
- Discovery Services and Asset Control
 - SNMP & WMI Discovery
 - The Role of Asset Control
 - Archiving & Reporting
- Web Forms
 - Barcoding and Data Updates
- Executive Reports Pack

ONE OF THE HIGHEST RATED MODULES WHILE SIMULTANEOUSLY BEING ONE OF THE LEAST UNDERSTOOD.

Like Batman's utility belt, LANDESK Data Analytics contains a bewildering array of tools and technologies to solve an equally wide range of challenges.

One of the biggest problems with Data Analytics is that when faced with a shark many don't realise that Bat Shark Repellent is close at hand. Worse still, not knowing the contents of your utility belt means that chances to improve the business aren't identified simply because the capability isn't known or understood.

Holy Missed Opportunities Batman!
